Subject: EMS 180: Memo 3 - Sustainability of Wind Farms

This document summarizes the the results of a fact-finding research on the three sustainability capitals (People, Planet, and Prosperity) of Wind Farms.

To begin the investigationThe current growth average forecasted from 2025 to 2030 is 8 % per year according to [1]. This is notably less than the growth rate number from Ashby's chapter on Wind Farms which was 25 % per year.
